Revision Strategy 1:

The best thing to do is to go through example questions in the exam workbook listed above. You shouldn't do this until you've tried one of the other revision strategies below.

Revision Strategy 2:

Make flash cards using the revision guide or one of the websites and get someone to test you.

Revision Strategy 3:

Copy out a revision guide or notes from one of the websites, or turn it into a mind map. You may want to do this in a colourful way to help you remember

Revision Strategy 4:

Use the quizzes on the websites above to test yourself. Once you know which areas you are weaker on, you can use one of the other revision strategies, or watch the videos on the link above, and then try again.
